EDUCATION

Taylor's University   **Subang Jaya, Malaysia**
Bachelor of Software Engineering (Honours)
- **GPA:** 3.39 / 4.0
- **Relevant Coursework:** Software Engineering Fundamentals, Data Structures and Algorithms, Programming Languages, Database Management Systems, Web Development

WORK & LEADERSHIP EXPERIENCE

SimplifyNext   **Kuala Lumpur, Malaysia**
Technology Analyst, Full-time   Jan 2024 – Jan 2025

- As a Technology Analyst, I design, develop, and implement robust robotic process automation solutions, collaborating with cross-functional teams to streamline business processes and achieving significant improvements in efficiency.
- Selected Project Experience:
  - Power Apps Interface for Bank Mandate and Closing
    - Developed and optimized an intuitive interface that streamlined bank mandate management and the bank closing process, leading to a 30% boost in operational efficiency.
  - UiPath with GenAI and Azure DocIntel Integration for Exchange Program Validation
    - Created a sophisticated robot to automate the validation of exchange program applications, enhancing review process efficiency by 50% and significantly reducing manual errors, allowing faster decision-making.
  - UiPath Automation for Claims Processing
    - Developed a dynamic robot that automated the downloading and uploading of invoices, driving a 40% improvement in invoice management efficiency and reducing manual workload, saving valuable time and resources.

Breakthrough Academy   **Remote, Malaysia**
Web Developer, Internship   Apr 2023 – Aug 2023

- Led multiple website development projects, demonstrating adaptability and leadership, while utilizing technologies such as Editor X, HTML/CSS, JavaScript, PHP, and WordPress to deliver visually captivating, functional, and responsive websites, fostering cohesive teamwork and successful project outcomes.

transact2   **Remote, Malaysia**
Full Stack Developer, Internship   Jan 2021 – Apr 2021

- Contributed to the development of Transact2's HR solution software using Vue.js and JavaScript, crafting intuitive forms seamlessly integrated with Node.js and MySQL backend operations.
- Utilized proficient Git skills to facilitate collaborative efforts within the team, ensuring the delivery of robust solutions for streamlined data manipulation and enhanced user experiences.
